by Anselm Dovetonsils
illustrated by Harriet Klausner
Foreword from the Author

Authors see again their words.

The method and the poets of Sonnets and the Portuguese this explain the mind of the mine. I made the examination of my older work, and translated it in Babelfish using itself Portuguese. I translated it in the English thence thus another one one hour in the Portuguese for ahead, in the returned text the same way when translated another one in one or felt.

The result is the poetry that makes the blood to function the cold and the useless head in one stew.
